Catalogue 2016

Pescatech
Cleaning solutions for professionals
Using this catalogue

For ease of use, we have made this catalogue a fully interactive one!

Click through to any section from the table of contents on the next page.

Be on the look out for various play buttons throughout that will allow you to view instructional videos or learn more about specific products.

The nifty TABLE OF CONTENTS button on the lower right of every spread also allows you to jump straight back so you can click through to another section from the table of contents.

Ordering a product

Let’s, for example, say you’d like to order a Yellow Hand Scrub Brush...

To order a product in the desired colour, specify the product code (in this case 3890), followed by the desired colour number. (e.g. Yellow = 6), therefore 38906

The format is consistent throughout, except for products without colour variations

Note that not all handles fit all items – see available adapters on page 38

Hand Scrub Brush

BRISTLE CHARACTERISTICS KEY:
- Soft
- Medium
- Hard

Heat-resistant: products are resistant to hot surfaces e.g. grills and heat sealers.

Split filament: provides a thorough and effective clean without damaging surfaces, as well as greatly enhancing the water holding capacity of the brushware, enabling large amounts of water saving.

COLOUR CODE:
- Pink
- Green
- Blue
- Red
- White
- Yellow
- Orange
- Purple
- Black

Product proudly produced in South Africa

02 PESCATECH
Perfecting the art of cleaning

03 360° HYGIENE SOLUTION DEVELOPMENT
Complete Hygiene Solution Development designed around your particular challenges

04 VIKAN HYGIENE SYSTEM
Maximum hygiene cleaning implements: brushes, squeegees, scoops, scrapers and more

06 TOOLFLEX
Swedish cleaning equipment holders and rails

08 SHADOW BOARDS
Arrange, secure and isolate your cleaning equipment from dirt, theft and cross-contamination

10 LOCKING MECHANISMS
Ensuring secure storage of cleaning equipment

12 VIKAN FOAM CONCEPT
Items required for water control; foamer’s and waterguns, hygiene hoses and couplings

14 ECODORA
High-quality industrial hosereels and hoses

16 RO tener
Stainless steel cleaning and sterilisation equipment for staff in the food industry

18 BLUCHER & BLUCHER EUROPIPE
Superior floor drains and drainage pipe systems

20 ENDURA
Grease trap with solid basket – complete FOG Management for commercial kitchens

22 VIKAN MICROFIBRE CONCEPT
High quality microfibre mop cloths, mop frames, preparation kits and microfibre cloths

24 IPC EUROMOP
Durable range of mops, wringers and cloths

26 VIKAN TRANSPORT SYSTEM
Water saving split-bristle brushware, waterfed handles and window squeegees

28 BIOFILM REMOVE
Active biofilm detection and removal

30 PLUM
Protective hand care and visible first aid solutions

32 STERIPOWER
Touchless, automatic hand disinfection unit

34 HAGLEITNER
Innovative dispensing solutions, foam soap, disinfecants, paper towels and air fresheners

36 DUALFLOW PLUS
Ultra-fast, high performance hand dryers

38 FREQUENTLY ASKED QUESTIONS
Your questions on pricing, ordering, delivery and returns answered

Perfecting the art of cleaning

A mighty task and one we’ve been doing with great pride for the past 21 years.

We lead the way in developing the South African hygiene industry, always staying up to date with the latest international hygiene trends. Every product we supply is designed to use less water and harmful chemicals, last longer and be more efficient.

As the market leader in the import and distribution of top international (as well as locally-sourced) cleaning solutions, we’re the first choice for some of South Africa’s biggest companies when it comes to revolutionising their cleaning processes and equipment.

Let us do the same for you.

With our dedication to offering you only the highest standard in service delivery and support from our knowledgeable Hygiene Specialist team, we can perfect the art of cleaning, together.

A few of our brands that we utilise:

Enquire about a 360 Hygiene Solution today and we will develop a solution beyond your wildest dreams. We are amongst those that dream about sound, impregnable hygiene solutions.

360° Hygiene Solution Development

The ultimate combination of cleaning solutions.

Pescatech’s 360° Hygiene Solution Development service is the embodiment of Pescatech’s commitment to our customers in aiding them every step of the way to the attainment of their hygiene goals. Backed by our 20 plus years of experience within the cleaning industry, we provide complete solutions to what you have become accustomed to believe are insurmountable challenges.

We have the expertise to provide solutions, design and build bespoke elements, install these elements on site, and monitor performance to save you time and money.
Vikan Hygiene System

Taking food safety to the highest level.

Vikan provides reliable solutions to avoid cross-contamination — a key driving force behind successfully meeting the stringent hygiene requirements and health and safety legislation required of the food and beverage industry.

Vikan purposefully designed their hygiene system around the principles of HACCP to empower organisations to easily enforce these standards, merely through the correct application of their hygiene equipment.

- Easy to use, easy to maintain
- Efficiency of tools reduces the amount of cleaning materials needed
- HACCP compliant
- Colour-coded tools made from FDA and EU approved materials
- Heat and chemical resistant
- Comprehensive range ensures every surface and equipment type can be cleaned hygienically and efficiently.

Maximum hygiene.
Maximum efficiency.
You can always rely on Vikan.

Applying the Right Processes

Vikan offers hundreds of products for the hygienic needs of not only that of the food and beverage industry, but of anyone facing a hygiene challenge.

Ensuring that the correct products are used for the right challenge is a crucial step to implementing an effective hygiene system. Vikan design and continuously improve their Hygiene products based on the principles of simplicity and intuition, aligned with the needs of their customers.

These principles have resulted in an easily understandable colour-coding system that compliments the fulfilment of HACCP protocols.

Nailbrush & lockable cable included. Stainless Steel.
Which Vikan Squeegee is the best Squeegee for you?

Vikan’s squeegee range, like the rest of their hygiene system, is colour coded in order to prevent cross-contamination and proactively support the application of the principles of HACCP.

**Classic Squeegee**
Foam rubber blades are extremely durable; the squeegee may move both water and debris with ease, across all floor types; epoxy, tiles, cement, etc.

**Hygienic Squeegee**
Designed for water intensive areas with stringent hygiene requirements. The rubber blade is non-porous, creating a squeegee that is easily cleaned and exceptionally hygienic.

**Condensation Squeegee**
The condensation squeegee is unique in its ability to dispose of condensation either to the floor or to a container, from over hanging structures and pipes. Ensuring that water does not contaminate your product and exceptional hygienic standards are upheld.

From a smart idea to a global success.

Thirty years after the initial product launch Toolflex has gone from a simple idea to a smart system. Manufactured in Sweden, products have continuously developed both in terms of design and materials. In order to maintain the highest quality standards and adapt to ever-changing market needs in specifically the hygiene industry.

Equipment storage and organisation does not need to be complicated. Ingenious design is all that’s needed to simplify your everyday life.
Shadow Boards

Create an organised and standardised storage space for your cleaning equipment with Pescatech’s range of shadow boards, customised to suit your needs.

Embodying 5S methodology, shadow boards greatly enhance your implementation of the principles of HACCP, decreasing the risk of cross-contamination.

- **Sort**: Save time, as tools are ready, accessible and always in the same place
- **Streamline**: Tools cannot be lost if rules are abided by, saving on replacements
- **Shine**: Clean completely and maintain a high standard of hygiene
- **Standardise**: Set the procedural norms required for excellence in particular environments
- **Sustain**: Ensure the quality of work is maintained in the long-term

They may be customised for Food Contact, Floor Contact, Allergen Control, Glass Breakage and off-Floor Contact environments.

**Note**: Brushware sold separately.
Locking Mechanisms

Control, protect and ultimately maintain your cleaning equipment with the aid of locking mechanisms. Perfect for safekeeping off the floor, yet visible, making it quick and easy to see if something is missing or damaged.

Locking Mechanisms

- Easy, fast access to stock
- Can be custom-made to accommodate your needs

Hooks, rails and locks sold separately

| 21 |

HOOks

- Can be used on a shadow board or as part of your wall-mounted stock control area
- Available in 1m and 1.5m lengths

P-074: R2,178

940 x 120 x 80mm

5602 (1000mm): R271
5603 (1500mm): R285

Note: For rails that are to be installed on ISO panels, clients will need stainless steel backing plates.

Note: For rails that are to be installed on ISO panels, clients will need stainless steel backing plates.
Vikan Foam Concept

Rapid open plant cleaning and water control.

The pre-emptive step prior to a rigorous scrubbing? An all-encompassing application of foam. The Vikan Foam Concept enables quick and broad application of foamed cleaning detergent for large open plant cleaning; be it populated with equipment or open surfaces. The ability to use water economically is highly important and the Vikan Foam Concept ensures that water is not wasted and may be used when required.
Controlling water usage with water tight water control

The Vikan Heavy Duty Water Gun is a game changer. Enabling high quality water distribution within a durable casing, it is able to withstand tough environments and ensure efficient water consumption. Excessive water usage is minimised and allows users to utilise the amount of water required, rather than drenching every surface in sight.

- Hygiene hose available in 15m/20m or customised lengths and ½" & ¾" outlets.
- Complete Hose supplied with ½" female coupling (0701) attached
- Hose and couplings can withstand a maximum pressure of 20 Bar and 70°C

Note: All couplings are manufactured with Nickel Plated Brass.
Ecodora

Industrial Hose Reels of the highest quality.

Manufactured and imported from Italy, Ecodora’s wide range of high-quality industrial hose reels and hoses are as effective as they are easy to use.

Store your hoses off the ground and out of the way, yet easy to find, while protecting it from twisting. A top-quality retractable coil spring ensures that the hose reel remains maintenance free. This cost-effective solution ensures your hose lasts longer.

Ecodora’s industrial strength hoses mean no more water leaks and a more hygienic way of cleaning.

Roser

Superior hygiene control for your staff.

Processors in the food industry worldwide rely on ROSER equipment to ensure the quality and safety of their products. ROSER provides the only system available on the market that ensures cleaning and sterilisation of workers who handle foodstuffs.

Note:
All wash basins and washers require a pressure regulator of 3 Bar and mixing valve. Pricing On Application applies, please contact Sales Support to find out more.

The full Roser catalogue is available on request.
Blücher

Keeping up the flow.

Save money on the cost and disruptions of inferior drains. Choose Blücher, one of Europe’s leading producers of stainless steel drainage systems. Innovative products and rigorous testing ensure high quality, excellent flow capacity and optimum hygiene, combined with minimal maintenance. Suitable anywhere – from multi-storey apartments and food processing factories to hospitals and cruise liners.

Concrete and tiles without membrane – fixed
Selected grating
Filter basket
Optional water trap

Easy to install and clean, Blücher drains are corrosion and fire resistant, and are able to withstand loads of up to 8000kg.

30 easy to install and clean, Blücher drains are corrosion and fire resistant, and are able to withstand loads of up to 8000kg.

31 easy to install and clean, Blücher drains are corrosion and fire resistant, and are able to withstand loads of up to 8000kg.

The full Blücher catalogue, including prices, is available on request.

Blücher EuroPipe

The most reliable and easy-to-use drainage pipe work system on the market.

The system consists of pipes and fittings in stainless steel grades AIS, 304 and 316L with sockets and lip sealing rings. Apart from excellent hygiene properties, products in the range are also corrosion, temperature and fire resistant. Its low weight, innovative design and easy handling leads to a better working environment and its fast installation means that no specialised welders or fitters are required to get your system up and running.

Endura

The latest innovation in grease management.

Endura has designed a grease trap that is not only cost effective, reliable, lightweight, compact and durable, but also easy to install (in-floor, on floor or semi recessed), easy to maintain (removable parts and easily available spares) and very, very hard working.

Microfibre Advantages and Preparation Tips

Advantages of the Microfibre Concept:

Less water required:
- An independent survey performed on the efficiency of the Microfibre Concept, found that an organisation cleaning 6,300 m² was able to save 12,000 litres of water per annum.

Save time:
- Buckets do not need to be refilled and lugger around, in addition to this, the drying of the floor occurs rapidly in comparison to regular mopping.

Save money and consumption:
- Through the use of microfibre cloths, cleaning chemicals need not be used in such large quantities, if at all.
- Longevity of the items ensures that regular replacement of items is a thing of the past.

Eco-friendly:
- Due to lower chemical usage and water consumption than regular mopping, the microfibre concept is ideal for your cleaning challenges, and the planet.

Preparation of the Microfibre Concept in a Washing Machine:

1. Shake dust from the microfibre mop cloth to remove loose dirt/sand.

2. Pre-wash: rinse the microfibre cloth in warm water (without added chemicals) by hand to remove any chemicals or excess grease.

3. Wash the microfibre cloth in a washing machine. (Ensure a washing detergent between the pH levels of 4 and 10.5 are used for maximum longevity)
   a. Recommended washing temperature: 45 – 60°
   b. Maximum washing temperature: 95°

   Never use chlorine products, QAC or other harsh finishing agents. These chemicals reduce the microfibre cloth’s ability to absorb and transport dirt and wear out the material.

4. Drying may be hung out to dry or within a tumble dryer post wash, however the temperature must be below 55. (Microfibre cloths may be autoclaved in steam at 121° for 20 minutes.)
Multi Clean – DampDry 31

Unique design: The combination of both dry and damp mopping benefits enable easy adaptation of the cleaning approach according to the challenge at hand.

Best utilised: Devised for smooth floors, such as vinyl, this mop provides the ability to implement application variations depending on the extent to which the floor is soiled.

In addition: Used Dry, the electrostatic charge helps collect dust and debris in medium soiled areas. Used damp, the capillary action delivers an outstanding deep clean in light to medium soiled areas.

Rapid Clean – Damp 43

Unique design: The tough microfibre yarn loops pick up dirt and sand, simultaneously, the cut loops absorb and transport moisture for greater coverage, depositing the right amount of water to ensure an effective clean.

Best utilised: Robust and tough microfibre yarn make the Damp 43 perfect for the toughest of daily cleans on uneven floors – such as tiles & rubber safety floors.

In addition: It has the ability to clean large heavily soiled areas quickly and effectively, such as entrances and corridors.

Deep Clean – Damp 47

Unique design: Damp 47 was designed in conjunction with one of the world’s leading fast food chains in order to combat greasy kitchen floors, aided by a unique weave to increase microfibre content.

Best utilised: Greasy floors in kitchens, performing outstandingly on tiles and other structured hard floors.

In addition: Despite the unique weave and increased microfibre content, there is no loss of productivity and Grease is easily dispatched to the drain.

Heavy Duty – Damp 48

Unique design: A bulkier construction combining absorbent viscose and microfibre, which creates a reservoir of water to extend the coverage in even the most demanding areas.

Best utilised: Ideal for medium to heavy soiling on smooth surfaces. The raised microfibre stripes help cut through the toughest dirt and the stranded fringe help to collect heavier particles.

In addition: Its unique construction makes it a very effective all-round mop with a very low level of friction.

Easy Dry – Dry 24

Unique design: A 100% microfibre design, for dry sweeping of dust, dirt and hairs – utilising the electro-static charge that develops in the dry fibres.

Best utilised: Ideal for wards or other high-traffic environments where noisy vacuums and trailing cables may be a disturbance and increase risk of tipping.

In addition: Suited for busy areas where large pieces of debris make one-step cleaning less practical, or to save time where a daily damp/wet mop is not required.
WINDOW CLEANING

Window Cleaning Kit
- 549101: R1,800
  Handle length: 495mm-880mm

IPC Euromop durability

Maintaining the status as a market leader requires high levels of dedication, commitment and persistence. As well as excellence, sacrifice, diligence, and of course, spare-parts.

IPC provides replacement parts for their high quality Mop Trolleys and Speed Plate mop frames to ensure you are able to get the highest mileage possible out of your products, and be able to save money in the long-term.
Vikan Transport Concept

The special ingredients required for cleaning vehicles?

Brushware capable of minimising water consumption and maximising cleaning capacity.

The Vikan Transport Concept utilises split bristles for exceptional water retention capabilities. This enables water saving whilst cleaning, as well as gentle yet assertive contact with vehicle paint and decals. The split bristles retain water and soap to a much greater extent than regular bristles – allowing greater areas to be cleaned. This ensures that stubborn dirt and residue is removed, but not vigorous enough to damage or remove vehicle decals and paint jobs.

TABLE OF CONTENTS
Biofilm Remove

Innovative solutions in the detection and removal of biofilms.

The presence of biofilms is a major cause of contamination of the final product. It’s invisible to the naked eye and cannot be removed with a normal clean.

**STEP 1: DETECT**

BioFinder reacts in the presence of biofilms, so you can immediately spot any contaminated areas with a simple visual inspection just after spraying BioFinder on the facility’s surfaces.

Eyewash first aid solution: an accessible eyewash solution

Make your first aid visible, so it’s easily accessible when accidents occur.
Disinfection with perfection

The touchless hand disinfection unit.

**Mains or rechargeable battery operated**
Permanent mains or rechargeable battery operated (flexible positioning), stand by time approx. 6 weeks. Optical signal before power shut down.
Optional: pluggable power supply

**Sensor**
When putting one’s hands into the opening the sensor releases one application with the specific dosage.

**Wide opening**
For touchless disinfection of both hands at the same time. Excess liquid can’t harm floor or working surfaces.

**DIN charging connection**
To connect to the mains with enclosed charger.

**No maintenance**

**Optional: Counter**
Operation/application counter, for monitoring dosage as well as amount of applications.

**Door release**
Optional connection for signal operated door release.

**Dosage**
Application specific dosage setting in 10 levels from 0,5ml to 5ml.

**Compatibility**
Works with all known disinfection liquids (0,5 & 1,0 litre containers).

**Spraying**
Covers both hands equally with disinfection liquid. No nebulising, therefore no aerosol vapours.

**Collecting dish**
With absorbing pad. Excess liquid will be captured and enclosed.

**Dimensions**

Hagleitner

Innovative hygiene.
Our contribution to your success.

Hagleitner provides perfect systems to deliver clean dispensing solutions for the washroom and sanitary areas. As trendsetters in the field of hygiene, Hagleitner continuously strives to come up with new, innovative solutions. Solutions that work for you.

The benefits of the Hagleitner XIBU senseTOWEL

Heavy duty housing
The ABS plastic housing is resistant to knocks and scratches. The dispenser surface is easy to clean.

Simple cover opening
You only need one hand to open the dispenser. The dispenser lid opens automatically and gently upwards.

Flexible installation, anti-theft protection
Double-sided cover lock for flexible wall mounting. Your refill is protected against theft.

Battery charge display
The LED light shows you how much charge is left in the battery.

Easy battery replacement
Changing the battery takes just seconds – thanks to the easy-access and removable battery compartment.

Calculable paper consumption
The integrated blade mechanism cuts the paper to a fixed length before dispensing it. The amount is perfect for drying the hands. The next sheet is dispensed after a time delay. This optimises use.

Operational readiness at a glance
The LED signal displays the operational status. Flickering between green and red means either the battery or the consumable is low.

“Never empty”
If the lower paper roll is empty, the dispenser automatically starts to use the top roll. Once half of the upper roll has been used, it moves automatically into the lower position to make room for the next refill. Your dispenser is practically “never empty”. That’s unique!

The Hagleitner Sense Management system provides live, actionable data on the state of your washroom dispensers.

Dualflow Plus

The hand dryer of the future.

Designed for high traffic, this new generation dryer ensures clean and dry hands in seconds. And with advanced design and state-of-the-art technology, the dualflow® plus ‘hands in’ dryer consumes up to 70% less energy than most dryers and eliminates water waste on the floor.

Advanced design

Dual sensors on each side of the unit for instant detection

Filters with antibacterial treatment, SurfaceAide™ XL

Neutraliser to remove unpleasant odours (optional)

Easy maintenance

Adjustable motor speed

Counters for total hours of use and the number of drying cycles

Outside valve to empty the water tank

Dualflow Plus Hand Dryer

Frequently asked questions

How does the pricing in this catalogue work?
All prices exclude VAT and delivery charges and are subject to change without prior notice.

How do I order?
All orders are to be placed in writing (fax or email). Orders must include: Order number, delivery address and contact details of the person receiving the order.

How does delivery work & when can I expect my goods to arrive?
Goods will be dispatched within 48 hours of receiving the order provided that the order reaches us before 12:00 and that payment terms have been adhered to. Cape Town clients will receive their order within 24 hours, and national clients within 72 hours, of goods being dispatched. Outlying areas may experience a delay in delivery.

Can I collect my order directly or use my own courier company?
Clients are also welcome to collect orders directly from Pescatech (kindly confirm that your order is ready before pick up) or use their own courier company (simply give us the courier account number and we will arrange for collection).

What are the payment terms?
Payment terms are strictly CAD (cash against delivery) or 30 days from statement, once a credit approved account has been opened. If a cheque deposit is made, we will only dispatch your order once our bank has cleared the cheque. This could take up to five working days.

Our banking details are: Pescatech CC, First National Bank, Account number 62315944795, Branch code 201 009.

What is the returns policy?
Returns need to be in their original packaging and condition and will be subject to a discretionary 10% handling fee. No goods will be credit noted if returned after 14 days.
